## TECHNICAL SKILLS

React.js, Flask, Redux, JavaScript, SQL, Python, Express.js, Node.js, CSS, HTML, JSX, Playwright

---

## PROJECTS

### Biscord

[Live](#) | [GitHub Repo](#)

A full CRUD application inspired by Discord (Flask, Python, JavaScript, CSS, JSX, React / Redux)

- Implemented communication infrastructure, leveraging websocket.io on both the front and backend allowing for real time communication between users.
- Applied raw CSS and JSX to style a significant portion of the frontend (LandingPage, ServerPage, ChannelPage, FriendsPage, sideBars) for a similar discord feel introducing dynamic UI styling.
- Implemented robust form validation using front-end validation techniques and the WTForms library, resulting in a successful implementation of form validation, ensuring data integrity and enhancing the overall reliability of the application.

### ChipIn

[Live](#) | [GitHub Repo](#)

A community platform for project building (Flask, React / Redux, JavaScript, Python)

- Integrated Redux for efficient state management, providing a streamlined flow of data and enhancing the user authentication process.
  - Utilized front-end form validation techniques to enhance user input accuracy. Implemented a robust validation mechanism using WTForms on the server-side for added security.
  - Integrated Redux for efficient state management, providing a streamlined flow of data and enhancing the user authentication process.
-
